

## WELCOME

... and thanks for downloading the Astro Empires fan kit!

This kit will help you set up an Astro Empires fan site, with lots of original material and sources not available from the official site.

We don't provide support for use of these files, since the content is pretty self explanatory assuming you have some working knowledge of web development.

However you think there is something we left out and care to make a suggestion, feel free to drop us a note (see the links section below).

## KIT CONTENTS

- **Art:** images to use wherever you want (according to the copyright policy)
- **Promotional:** promotional material (banners)
- **Screenshots:** in-game screenshots
- **Web:** sample website html code, including images, css, etc
